

REBUILD

11TH STREET BLOCKS

FROM CONCEPTS TO CREATION, CAPITAL CITY DEVELOPMENT CORP. (CCDC) IS FULFILLING OUR COMMUNITY'S EXPRESSED DESIRE FOR AN 11TH STREET THAT IS SAFER AND MORE CONVENIENT FOR ALL USERS TO ACCESS RESTAURANTS, ENTERTAINMENT AND OPEN SPACES.

CCDC is undertaking several large-scale projects originating from a multi-year planning effort between Ada County Highway District (ACHD), the City of Boise and CCDC. By taking a coordinated approach to what would be multiple projects, Rebuild 11th Street reduces disruption to downtown daily life and minimizes delays.

This project will complete necessary and anticipated roadway reconstruction and replace underground Boise City Canal structures dating back to the 1950's on behalf of ACHD and the Canal District. It makes long-envisioned bicycle improvements with an all-ages, all-abilities protected bikeway from State Street to River Street, and improves streetscapes where needed to support economic vitality.

REBUILD 11TH STREET BLOCKS

01

WHAT IS THE GOAL OF REBUILD 11TH STREET BLOCKS?

The goal for this project is to make planned improvements to the street, sidewalks, and intersections that provide safer, less congested travel options, a more comfortable experience, and expanded access to businesses whether arriving by foot, bicycle or vehicle.

02

WHY NOW?

For nearly a decade, the City of Boise, ACHD and CCDC have coordinated downtown Boise transportation and streetscape improvements to reduce impacts to businesses and travelers. This collaborative approach allows multiple projects to be consolidated into a single effort and 11th Street is the next effort in this planned coordination.

03

WILL I BE ABLE TO ACCESS BUSINESSES DURING CONSTRUCTION?

Yes! Throughout the phases of construction, the project team will ensure that businesses are accessible with ample detour signage and construction safety barriers. Additionally, the team will work to limit noise, dust and disruption as much as they can during business hours.

04

WHAT ARE STREETSCAPES?

Streetscapes refer to the design of our urban public right-of-ways including sidewalks, streets, and crossings. This project will make improvements such as increased lighting and street trees, added furnishings like bike racks, planters, and trash receptacles, and expanded sidewalks. All these enhancements create an attractive and inviting neighborhood and can help spur local economic activity.
